16:30	Next steps and closing words, Middleton Hall		

Our Panellists include

Louise Barker
Senior Investigator
Royal Commission on the Ancient and Historical Monuments of Wales

Peter Lawrence
Director of Coastal, Infrastructure and Minerals Crown Estate

Becca MacDonald-Lofts
Lead Officer
LGA Coastal SIG

Susana Lincoln
Senior Scientist
Centre for Environmental, Fisheries and Aquaculture Science (Cefas) and Marine Climate Change Impacts Partnership (MCCIP)

Imogen Wood
Senior National Consultant, Heritage & Climate National Trust

Workshops

Living Glossary

Stephanie Jones, Southampton University & Larissa Naylor, University of Glasgow

“What is ‘coastal’? What is ‘resilience’? What is ‘community’? And indeed, what is not coastal, not resilience, not community? In this workshop, we will co-create a living glossary for our community of practice. We will decide on a list of shared terms; explore their established and diverse meanings; and devise some fresh working definitions.

Creative Deep Mapping

Sarah Gambell, University of Glasgow & Kate Smith, University of Hull

“Doing deep mapping” is a brief practical intro to participatory mapping using Google MyMaps. In this workshop we will introduce a method for developing participatory "deep maps" which can include images, audio, and video media, as well as written narrative. This method is a flexible, accessible and effective tool for community exploration and engagement.
